

plurality of screen identifying information, or, alternatively may be a default GUI screen if the received screen from the host does not so match. This unique limitation derives from the specification at page 7 line 23 through page 8, line 26, which describes the flowchart of figure 2 of the application. It is believed that this automated selection between a custom GUI and a default GUI is not known to exist in the cited prior art.

The limitation noted above has been amended to independent claims 1 and 8 of the application. As such, it is respectfully submitted that claims 1 and 8 are in condition for allowance. In addition, claims 2 - 7 and 9 - 10, being dependent from claims 1 and 8 respectively, are also believed to be allowable.

Therefore, based on the amendment and comments above, reconsideration and allowance are respectfully requested.

Respectfully submitted,
